

Custom drum catalog 2010 - 2011

## What does custom mean

### **cus<sup>^</sup>tom (adjective)**

1 made or done to order for a particular customer

### **cus<sup>^</sup>tom drum (adjective)**

1 drums made to order for a particular customer

And when we say custom we mean custom. Sizes, shell-thickness, your choice of wood, hardware-type, hardware-color, shell-color and many more options. This sounds nice of course, but can also be quite confusing. That's why we will take our time to help you make the best decision.

Knowing your wishes and musical needs, we will put your perfect drumkit together.

**MMC Drums**

## Birch ply drums

One of most used methods of building drumshells are plyshells. MMC Drums also offers these ply drums, but with a little twist. Most shells are build with the grain running horizontal, but we like to run the grain vertical. This results in a faster resonance. Combine this with Birch wood and you get big sounding toms and a very responsive snare all with a very bright tone.

Our ply drums are standard build using Birch, but of course other woods are possible too. Another option is using a different wood for inner and/or outer facing. This is mostly done for aesthetic reasons as the overall sound won't change much.

**The prices printed are for our standard Birch drums. Please contact us for other woods and/or wood combinations.**

Birch ply kit in light blue sparkle.

10" Birch ply snaredrum in custom art finish.

All drums available in the following thickness: 4.5mm (with re-rings), 6mm, 7.5mm, 9mm or 10.5mm. Depth in every size up to diameter.

**Pricing on full kits (minimum of three drums): 15% discount on total.**

## Steambent one-ply drums

In the early days one of the most famous studio drums was made out of thick one-ply shells. These thick plies are bent using steam, resulting in a shell using far less glue than any other ply-shell. MMC Drums one-ply drums utilize these same type shells. The sound is full-bodied with enough power to cut through any kind of music.

**Standard woods include maple, birch, oak, ash, walnut and mahogany. Other woods are of course available upon request.**

14" Maple one-ply snare-drum in custom crazer finish.

13" Spalted myrtlewood in hand-rubbed oil finish.

All drums are supplied with maple re-rings, but same specie re-rings are available upon request. Depth in every size up to diameter.

### One-ply toms

	Finish I	Finish II
6" diameter	€ 414,-	€ 500,-

## Kelly SHU

The Kelly SHU™ provides your favorite standard kick drum microphone the shock-mounted, suspended platform needed to ward off stage vibration, low-end soundwave transfer and other mechanical interferences from clouding up your kick drum signal. The lengthy isolation cords provide an effective disconnection of the microphone from the kick drum and the stage that the kick drum sits on, both at the same time.

The Composite series Kelly SHU™ mounts are incredibly strong and durable, made using high-density reinforced compounds, injection molded under a tremendous amount of pressure. The Kelly SHU Composite™ accepts any standard kick drum microphone that has a threaded base or mic clip.

***The System requires NO DRILLING for installation!***

The Kelly SHU Composite™ series also gives you your choice of our exclusive internal and external installation options, both within the same product. Complete instructions for both options are included with each Kelly SHU™ shockmount.

**The Kelly SHU Composite™ is available for € 59,50 from [mmcdrums.nl](http://mmcdrums.nl) or [kellyshu.nl](http://kellyshu.nl).**

COMPOSITE™

## Concert snaredrums

MMC Drums is not only building drums for the drumkit drummer, but we're also here for the concert/symphony drummers. Our product range has been expanded with a selection of concert percussion. The snaredrums build by MMC Drums are available in a variety of flavors including ply and steambent shelled drums. The core of our ply-shells is made out of birch with an outer and inner ply of your choice. The wide range of choices include maple, ash, bubinga, zebrano, tamo and much more. Steambent shells are one-ply and available in an endless choice of woods with maple, bubinga and sycamore being the most popular.

**Concert snaredrums are available in two sizes: 14" x 5.5" and 14" x 6.5". Ply drums start at € 500,- and the steambent come in at € 700,-. Please contact us for an exact quote on your favorite choice of concert snaredrum.**
